## Cross-Border Dialogue - Conference Day

*Global changes, local resilience*

The rapid change of the world through technology will be seen in the society and adaptation is necessary. How can our region react and respond to these challenges that affect us, no matter on which side of the border we are located. How can we secure best future possible within the new world?

## What is the Cross Border Dialogue?

Cross Border Dialogue (CBD) is a movement initiated by young professionals from bordering regions of Austria, Czechia and Slovakia. CBD invites active participants across generations to discuss and present ideas for stronger cooperation of our regions together. Especially in current times determined by technological and hence societal change, we aim to connect ambitious individuals with common goal of prosperity of our regions.
